Why TimePilot Vetro?

The money savings:
► No more estimating (or guessing!) workers’ hours.
► Eliminates math errors when calculating time.

The time savings:
► Payroll prep takes minutes, not hours.

The bottom line:
► TimePilot Vetro pays for itself in just weeks!

Tear up your time cards: Move up to TimePilot Vetro

Touchscreen time clock system plugs into your network or stands on its own

► Employees clock in and out by tapping their iButton or by entering a 4-digit code on the sleek blue backlit keypad.
► No cabling needed! Mount the clock anywhere; collect your data with the included USB drive. Or plug it into your network for real-time data!
► Handles up to 500 employees—just add more iButtons.
► The TimePilot software generates reports and prepares your data for the top payroll software and services, including QuickBooks, ADP and Paychex.
► No annual fees; 30 days of free support to get you up and running.

What’s an iButton?
It's a key-sized, rugged identification device that is unaffected by water and most chemicals and comes with a lifetime warranty. iButtons are more reliable than biometrics for identifying individuals and can be reassigned quickly and securely.

What’s in the box?
• TimePilot Vetro timeclock
• 10 iButtons
• USB Drive
• Windows-based software
• Quick Start Guide
• Power supply

The Vetro timeclock system is designed and manufactured by TimePilot in the USA.
